

Listening Event: _____ Meeting_____

Date/time: _____ 10/04/2018_____

In today's meeting with professor, I can understand 90% content. It is better than before. Before the meeting, I try to preview the material of what he will discuss. Also, I read some papers professor recommended before. It helps me a lot to be familiar with the contents.

During the meeting, I write down the notes for review. When I met some unknown information, I asked professor for explanation. After meeting, I also continue a talk with professor, which help me understand more clearly.

I think the strategies I used are really helpful for me to understand more. I will continue to do these in the future classes.

If I could do more research in such area I think it would be more helpful. I can get more information about the content and more thinking of the research.

Vocabulary is the main reason why I cannot understand 100%.I will continue to overcome the vocabulary problem by reading and writing. Meanwhile, as I can follow the teacher's speed and be familiar with his speaking style, I believe I can do better and better.
